

CorAnet Corp. Awarded 2016 Corrections Market Partner of the Year by Axis Communications

Axis recognized CorAnet's performance and collaboration with partner award

New York, NY – March 7, 2017 – CorAnet Corp. has been named the 2016 Corrections Market Partner of the Year by Axis Communications. Coranet is a national IT integrator with expertise in LAN/WAN infrastructure, physical security and data integrity. [Axis Communications](#), the market leader in network video, announced these annual awards to top channel, software and technology partners at its 11th annual Axis Connect & Converge Conference (ACCC) in Tucson, Arizona.

CorAnet received this honor for its exemplary dedication to solutions that exceed the expectations of key clients. Partnering with Axis, CorAnet won this award through:

- Rapid procurement of 10,000+ security cameras for six facilities throughout a major municipality's correction system. The new cameras provided this city with major benefits, including:
 - vastly improved performance of equipment, offering security for everyone in the penal system
 - facial recognition and motion detection capabilities
 - better monitoring of penal facilities through a central network, anywhere in a secure municipal location
- Turnkey solutions for cameras at commercial offices and retail branches. We have provided design for logistics, equipment management, deployment preparation, installation and just-in-time inventory management for clients.

“CorAnet would like to thank Axis Communications for this honor,” said Margaret Marcucci, CEO & President of CorAnet Corp. “We value our ongoing partnership with Axis and the opportunity to improve the lives of citizens and workers in some of the largest population centers in the U.S.”

“Axis partners are not only part of the industry's largest professional network, but are also an extension of our team,” said Larry Newman, senior director of sales, Axis Communications, Inc. “It is an honor to bring together the top companies in our industry at our annual conference and recognize those strong relationships and shared sense of leadership in providing innovative
